Technical Site Visits

A group of representatives from the beneficiary institution and project technical team conducted a site visit to one of the pilot sites, identified for remediation studies on 1 July 2021. This team completed the final investigations in this site before submitting Technical Specification for the advertisement of the tender dossier by the Ministry of Environment and Urbanization, General Directorate of European Union and Foreign Relations.

Contaminated Sites Management Expert

Contaminated Sites Management Expert (Key Expert 3) was recruited as of July 2021 and will work on the finalization of tender dossiers with the project.

Technical Specification and Operational Plan

Soil Pollution and PRAG/FIDIC Consultants have finalized the preparations of technical specification and operational plan for two pilot sites that were contaminated by persistent organic pollutants.

Water Cycle and Persistent Organic Pollutants Video

Preparations for the video which will be designed to raise public awareness about the water cycle and persistent organic pollutants are already underway. The project technical team sent the draft script and video for beneficiary institution's reviews.
